Graduate Professional Development: Towards a National Strategy

Phase 1

Prepared for the Canadian Association for Graduate Studies in conjunction with the Consortium of Canadian Graduate Student Professional Development Administrators

Celiese Lypka, PhD Candidate
Mariana Hipólito R. Mota, PhD
University of Calgary

August 2017
Preface

Issues of employment and skills are becoming an integral part of graduate education. The administrators providing skills and career development training and assistance in individual universities realize that it is not only useful but also important to share and collaborate across the sector if graduate students are to receive the best possible offerings.

The Canadian Association for Graduate Studies (CAGS) has long been interested in helping graduate students develop the necessary skills for employment. This is demonstrated by CAGS commissioning a best practices document on professional skills development in 2012, identifying the theme of its Award for Excellence and Innovation in Enhancing the Graduate Student Experience as skills development in 2014, and by hosting a concurrent stream of sessions on professional development with the Consortium of Canadian Graduate Student Professional Development Administrators (CCGSPDA) at its 2016 annual conference.

The interest in professional development for graduate students extends to the Tri-Council. They are also interested in ensuring that the recipients of its grants and scholarships are provided with the best training and opportunities to succeed after they graduate, such as the requirement of professional development training and mentorship committees that would ‘value-add’ universities’ own offerings for the receipt of funding.

In discussions with Tri-Council administrators, it has been noted that a major impediment to accomplishing both the goals of universities and Tri-Council requirements for robust professional development programming, is a lack of understanding of what is currently being offered and delivered specifically for graduate students across Canada. This information is also important in the context of sharing our resources, and to leverage our strengths.

An additional challenge for all concerned is that while many institutions offer professional development programming for graduate students, there is little understanding of what benefit these additional offerings are providing to graduate students, and thus what constitutes professional success. To date, metrics such as participation rates have been the primary measure in Canada and the U.S., though it is recognized that this may not be the best measure of utility for students. It is also recognized that assessment would be a complex undertaking that would need to be addressed in a staged approach.

Working with the CCGSPDA, CAGS proposed a two-phase project. During Phase 1, CAGS will create a catalogue of skills development offerings available in Canada, to be housed on the CAGS website in order to help professional development administrators access content and keep up with trends and innovations. This report summarizes the data collected for Phase 1. Phase 2 will occur after the completion of Phase 1 and will initiate a process to assess the effectiveness of existing professional skills development programs for graduates with a view to laying the groundwork for further activity in this area.

Phase 1: Project Outline

This project seeks to update information on Graduate Professional Development Programs (PDP) in Canadian Public Universities as presented in the 2012 Report, “Graduate Student Professional Development (GSPD): A Survey with Recommendations.”

To accomplish this, Phase 1 of the project gathered information about the scope and delivery of professional development for graduate students in universities across Canada. This information will be used to create an on-line catalogue and national inventory of the above that will be a resource for professional development administrators. Phase 2 of the project will begin in the winter of 2017, and will explore current university practices in Canada and elsewhere to assess the reach, value, and impact of graduate student PDPs, thus laying the groundwork to optimize and expand professional development opportunities for graduate students across Canada.

Methods

Institutional Survey and Research

Research began by gathering publicly available information about the current climate of graduate student specific professional development in Canadian universities; this was achieved from a reading of current graduate studies websites and the CAGS 2012 report on professional development. From this initial research, alongside a review of a recent survey on graduate student professional development completed in Québec, various indicators were developed for the purposes of composing an institutional survey that would be distributed to administrators within the Faculty/School/Office of Graduate Studies to determine the current level of professional development specifically for graduate students at Canadian Universities.

A full sample questionnaire can be found in Appendix B. The questions of the survey focused on the following indicators:

- Types of graduate student specific professional development/training
- Listing of core competencies and those which are most popular
- Office responsible for coordinating graduate student PDP
- Number of staff/types of roles associated with graduate student PDP
- Participation tracking and rates in graduate student PDP over the course of an academic year
- Method of promotion and registration for graduate student PDP
- Integration of graduate student PDPs into academic curriculums or formal recognition
- Incorporation of labour market information and outcomes
- Strategies for developing positive relationships with employers

1 “Les compétences visées dans les formations aux cycles supérieurs.” Rapport présenté par le Groupe de travail ad hoc et adopté par les membres de l’ADÉSAQ

Phase 1, CAGS – August 2017
The survey results revealed that not all of these indicators are comparable across institutions and, as a result, these indicators were not included for a formal analysis in the report—although some issues are addressed in the discussion section of this report.

For the purposes of this report, only institutional members of CAGS were contacted to complete a survey. Fifty-five CAGS institutional members were contacted in September of 2016; 33-two universities submitted complete responses, two universities declined to participate, leaving nineteen that did not respond to inquiries. In instances where universities did not respond to surveys or general inquiries, information was gathered from university websites—these institutions are marked with an asterisk in pages 10-12 under Institutional Breakdowns. Websites were sometimes difficult to navigate and it is possible that information was missed in reading them if it was not to be found via standard pathways of investigation. As a result, the information gathered is not as complete as it might have been with a full listing of completed surveys.

The information was gathered and presented in such a way as to gather data on and share current trends in professional development for graduate students among graduate PDP professionals and other stakeholders, categorize graduate student PDP into distinctive groups (Categories 1-4, as outlined in the next section under the graduate professional development program rubric), and offer recommendations for next steps in the area of graduate student professional development in Canada.

Using the rubric that will be outlined further in this Report, to be in any category the institution must meet all four criteria, if it does not it is moved to the next category until it meets the minimum of all criteria. For example, an institution may offer advanced and entry level workshops, a branded program with accessible skill breakdowns, and a centralized website with active promotion of activities; however, the program is not a requirement (part of a supervisor checklist) and/or does not offer recognition of completion for the program so it is grouped as a Category 2 institution.

Results

1. Approaches to Graduate Student Professional Development – Four Categories

Based on the 2012 survey, approaches to graduate student PDP at Canadian universities were binned into four distinct categories. The report found that while Canadian universities are very different from one another in terms of professionalization for graduate students, there still

---

2 There are sixty-five CAGS institutional members, fourteen of which are individual campuses/universities connected to one institution. For the survey, two administrators were contacted for the ten institutions of Université du Québec; one administrator was contacted for the two campuses of Dalhousie University; and one administrator was contacted for the two campuses of the University of New Brunswick. There are sixty institutions specifically noted in this report.
appears to be patterns of organization, development, and administration that allow the binning of graduate student PDP into four categories:

“Categories 1-4 represent the most to least coordinated of approaches to GSPD delivery and it should be noted that universities of all kinds populate most categories. Categories 1, 2 and 3, for example, include universities with larger Graduate Studies operations as well as those with smaller numbers of graduate students and programs or newer Graduate Studies operations. Given their structures and historic practices, some universities are simply more amenable to centralizing Graduate Professional Skills programming than others.

Many factors will influence what will be right for each institution at a given time: the size of the graduate operation; the level of prioritization of GSPD activity by the senior administration of each institution; the availability of resources for GSPD activity; the degree of centralization of the institution (which affects the ease with which Graduate Studies is able to manage GSPD activities centrally); the ability of the Graduate Dean to prioritize GSPD given his or her own resources and staffing levels [...] All of these enter into the question of how best to manage GSPD in particular institutions at particular times.”

(2012, 21-22)

Following the defined categorization from the 2012 report, a visual rubric was created that would allow for an easy categorization of institutions’ graduate student PDP. The four categories were kept to show the spectrum of professional development programming for graduate students, ranging from institutions that are currently not active in graduate student PDP to those with a high level of advanced and entry level professional development activities. In order to determine where on this spectrum institutions might be placed, four indicators were created to monitor graduate student PDPs: level of graduate student PDP activity, program structure, integration of PDP into student experience, and PDP communication to students.

While this is not meant to be an exhaustive list, it offers a starting point to explore current groupings of graduate student PDP. As is evident by the slight difference in categorization from the 2012 report, graduate student PDPs continues to be an evolving component within Graduate Studies.
## i. Graduate Professional Development Program (PDP) Rubric

<table>
<thead>
<tr>
<th>Category</th>
<th>Level of Graduate Student PDP Activity</th>
<th>Program Structure</th>
<th>Integration of PDP into Student Experience</th>
<th>PDP Communication to Students</th>
</tr>
</thead>
<tbody>
<tr>
<td>Category 1</td>
<td>PDP activity level is high (offerings include advanced and entry level workshops).</td>
<td>PDP activities are coordinated across campus and collected under a clearly defined “brand,” which is overseen and endorsed by Graduate Studies. Skill categories are broken-down into accessible units for students.</td>
<td>The PDP is a required component for graduation or as part of the supervisor checklist. The program offers recognition for completion of its activities.</td>
<td>The PDP has a centralized website or linked web pages that clearly outlines all aspects of the program. The PDP employs every avenue of (pro)active communication (newsletters, social media, outreach tables, department presentation, ambassadors, etc.) to connect with students.</td>
</tr>
<tr>
<td>Category 2</td>
<td>PDP activity level is considerable (offerings focus primarily on entry level workshops, though they may offer some advanced level workshops).</td>
<td>PDP activities are in the process of coordinating activities across campus through Graduate Studies or a collaborative group. Program activities are a combination of partner offerings.</td>
<td>There is no requirement for graduation or formal recognition for completion of program activities; however, partner programs may offer certificates for teaching and/or learning.</td>
<td>The PDP has a centralized website or linked web pages that provides a general overview of the program. The program employs several ways of connecting with students (usually through newsletters and social media).</td>
</tr>
<tr>
<td>Category 3</td>
<td>Graduate professional development activity is moderate (offering primarily entry level workshops, generally focused on research).</td>
<td>There is no designated PDP; individual graduate professional development activities are offered by partner programs, online modules, or if requested by students.</td>
<td>n/a</td>
<td>Graduate Studies’ website lists partner program workshops or online resources, or directs students to partner website and/or website does not provide easily accessible information. Some only provide information by student request.</td>
</tr>
<tr>
<td>Category 4</td>
<td>Graduate professional development activity is not (yet) active.</td>
<td>n/a</td>
<td>n/a</td>
<td>Graduate Studies is not involved in professional development and does not prioritize it on its website not prioritize it on its website.</td>

Phase 1, CAGS – August 2017
2. Observations from Survey Results

The following are trends observed from the 2016 surveys that were completed:

i. Core Competencies for Graduate Student PDP

The following is based on thematic groupings of responses from Category 1 and 2 institution responses to the survey.

- Career Building
- Health and Wellness – (newer category focus for many institutions over the last five years)
  - Physical & Mental Health
  - Personal and Business Finance
  - Reconciliation
  - Spirituality
- Innovation
- Leadership & Management
- Internet Tools
- Success in Graduate School
  - Communication & Writing
  - Ethics and Responsibilities
  - Research
  - Scholarship & Funding
  - Teaching

ii. Most Popular Workshops/Sessions

When asked which workshops/sessions were most popular in their programs, institutions report the following as their most in demand offerings for students:

- Career Planning
- Ethics & Copyright
- Networking & Job Searching
- Presentations & Public Speaking
- Project Management
- Software & Online Branding
- Teaching
- Writing for Grad School
iii. Boot Camps and Full/Multi Day Sessions

The following sessions are over 4 hour increments and run in sequential days; they exclude graduate orientations, Mitacs workshops, or graduate student PDP conferences. The majority of these courses are related to writing skills.

Phase 1, CAGS – August 2017
iv. Graduate Student PDP for International Students

Many graduate student PDPs integrate concerns/issues specific to international students into more general workshops, or guide students to take workshops offered by their International Students Association, which are not specific to graduate students. As evident by the session “Addressing the Challenges” at the CAGS Annual Conference (2016), the amount of support and resources for International Graduate Students in regards to their specific concerns for graduate student PDP, and graduate programs more generally, is lacking.

viii. University Websites for Graduate Student PDP

While many universities offer a wide range of graduate student PDPs to their graduate students, their websites are sometimes difficult to navigate and do not easily outline the various workshops or sessions in easily recognizable groupings (i.e. sessions listed under thematic skills subcategories: communication, writing, research, etc.). Generally, graduate student PDP sessions are only available to look up from the dates posted to the events calendar, which makes it more difficult for students to quickly see all the PDP offerings that are available and find those that would be most useful to them. The following universities have engaging, easy to navigate websites that, from a student perspective, allow for an accessible guide to what graduate student PDP offerings are available through thematic skills subcategories, and how the program works overall.

ix. PDP Available to Postdoctoral

The following institutions welcome postdoctoral fellows to attend PDP offerings. However, the workshops/sessions do not necessarily specifically address postdoctoral fellows’ concerns or needs (as most offerings are focus on graduate student needs), and fellows may not be aware of the PDP offerings available to them (as they are not always included on the various listservs that promote PDP):

- Brock University
- Concordia University
- Dalhousie University
- Institut National de la Recherche Scientifique: sessions that address scholarships and the boot camp Techniques de Survie Scientifique
- McGill University
- Memorial University
- Queen’s University
• Ryerson University
• Saint Mary’s University
• Simon Fraser University
• Université de Montréal
• Université de Sherbrooke
  o Offers 2 PDP courses specifically for postdoctoral fellows: *Enjeux contemporains et recherche transdisciplinaire I*, and *Enjeux contemporains et recherche transdisciplinaire II*
• University of Alberta
• University of British Columbia (some sessions available to postdoctoral fellows)
• University of Calgary (some sessions available to postdoctoral fellows)
• University of Guelph
• University of Lethbridge
• University of New Brunswick
• University of Ontario Institute of Technology
• University of Ottawa (some sessions available to postdoctoral fellows)
• University of Saskatchewan
• University of Toronto
• University of Victoria
• University of Waterloo
• University of Winnipeg
• Western University (some sessions available to postdoctoral fellows)
• Wilfrid Laurier University
• York University

x. Other Graduate Student PDP Offerings and Notes of Interest

Regional Initiatives

The Réseau de l’Université du Québec has created professional graduate projects to be implemented across ten institutions: Université du Québec à Montréal (UQAM), Université du Québec à Trois-Rivières (UQTR), Université du Québec à Chicoutimi (UQAC), l’Université du Québec à Rimouski (UQAR), Université du Québec en Outaouais (UQO), Université du Québec en Abitibi-Témiscamingue (UQAT), Institut national de la recherche scientifique (INRS), École nationale d’administration publique (ENAP), École de technologie supérieure (ÉTS) and Télé-université (TÉLUQ).

Promotion du Développement des Compétences Informationnelles (PDCI) aims at promoting computer-based skills: [http://ptc.uquebec.ca/pdci/](http://ptc.uquebec.ca/pdci/) In addition, there are two projects currently being elaborated/implemented: the first of them will allow students to earn one credit once they complete one of the professional skills courses to be available on line; La gestion de mon projet de recherche was determined to be the first one to be offered within Réseau UQ. The second project aims to provide certificates concerning pedagogic skills; the project is currently in its starting phase and approaches themes related to learning and pedagogy.

*Phase 1, CAGS – August 2017*
Required Graduate Student PDP

Currently, most institutions do not have a required graduate student PDP component, though there are several departments (engineering, business, biochemistry, etc.) as well as many NSERC-CREATE programs within various universities who have graduate student PDPs internally as part of their degree requirements. Many surveys indicated that although graduate student PDPs are not generally required, they are part of the supervisor checklist and are expected to be recommended/encouraged to graduate students. However, the following institutions diverse from this:

- **École de Technologie Supérieure**: Course-based Master’s students must complete the online offering on intellectual integrity
- **Polytechnique de Montréal**: PhD students must complete four GPDP offerings:
  - Réussir au doctorat
  - Traitement de l’information scientifique et technique
  - La créativité à votre portée
  - Conduire un projet de recherche
- **University of Alberta**: as of September 2016, Graduate Students must complete 8 hours of PDP under the Individual Development Plan (IDP) www.ualberta.ca/graduate-studies/professional-development/professional-development-requirement/individual-development-plan
- **Université du Québec à Chicoutimi**: students must complete a course on Compétences Informationelles aux Cycles Supérieurs, which concern themes related to research strategies
- **Université de Sherbrooke**: 6 to 8 credits from CUEFR is required of postdoctoral students for each diploma. Postdoctoral students choose the courses with their supervisor, as part of their training program. Otherwise, courses from CUEFR are chosen on an individual basis for graduate students.

Graduate Guides

**University of British Columbia** offers a detailed plan that helps guide students through the primary stages of their graduate education, providing advice for students on strategies for attaining academic and career success www.grad.ubc.ca/current-students/graduate-pathways-success/graduate-game-plan or www.grad.ubc.ca/current-students/graduate-pathways-success/graduate-guides.

**Institut National de la Recherche Scientifique** has three different guides available online. They are concerned with research integrity and how to successfully manage graduate school: inrs.ca/sites/default/files/etudier_inrs/etudiants_actuels/INRS_Guide_de_letudiant_Integrite_Recherche.pdf; and:

Phase 1, CAGS – August 2017
Université de Québec en Outaouais provides an online guide on student integrity, which offers advice concerning research (i.e. how to cite sources, what constitutes plagiarism, how to initiate research, etc.): http://uqo.ca/docs/12464

Graduate Student Volunteers

University of Calgary and Concordia University have volunteer graduate students (My GradSkills Ambassadors and GradProSkills Ambassadors) who volunteer to help promote PDP to graduate students in their department and function to help provide feedback to evolve PDP programming. Calgary: www.ucalgary.ca/mygradskills/ambassadors and Concordia: www.concordia.ca/students/gradproskills/events/ambassador-program.html.

Graduate Student Staff

Concordia University hires approximately 15 graduate students on part-time, non-renewable one-year contracts to help run PDPs from the Graduate Studies Office; Workshop Leaders, Workshop Assistants, and Communications Assistants www.concordia.ca/students/gradproskills/about/jobs.html. University of Waterloo hires graduate students as GRADVventure Specialist positions to help run the program, they also have volunteer positions.

Undergraduate Participation

Brock University invites fourth year undergraduate students to take PDP offerings as a stepping/recruitment strategy.

International Graduate Students Specific PDP

Université de Montréal is currently developing PDP for international students, as well as a mentoring program involving doctoral students (mentees) and PhD graduates from the Université de Montréal (mentors).
Slide Sharing

University of Alberta, Athabasca University, Dalhousie University, Queen’s University, and the University of British Columbia have uploaded presentation slides from past workshops for students to consult online.

École Nationale d’Administration Publique has several powerpoint presentation slides available on its boîte à outils; slides are mainly on topics concerning research: how to create an academic CV, how to publish, and how to conduct qualitative analysis.

Université du Québec à Trois-Rivières has several explanatory slides available online under its Babillard des Cycles Supérieurs. Slides are research-related and approach how to conduct research, disseminate research results and develop professional skills.

Entrepreneurial Thesis & Training

University of Calgary has focused efforts on helping graduate students who have an interest in starting a business or developing a product. Relevant information has been gathered into one webpage (http://www.ucalgary.ca/mygradskills/starting-business). Unique offerings associated with entrepreneurialism include:

- Introduction to Entrepreneurship, graduate level course open to non-business graduate students.
- Venture Creation, graduate level course open to business and non-business graduate students with a compelling market opportunity or problem.
- Summer Incubator Program (with Innovate Calgary)
- Graduate Scholarship in Entrepreneurship and Innovation

Discussion

Categorization of Graduate Student PDP

Many who participated in the 2012 and 2016 survey noted that the report was a good idea and would provide valuable information and ideas. However, as information was gathered from both surveys, it became clear that Graduate Student Professional Development is very complex and that the information amassed so far would likely be incomplete.
Hence there was/is a general sense that:

- Comparisons between institutions for raw data is difficult/inconsistent
- Many programs are currently under revision and/or developing new programming
- Not all institutions are participating, and only public institutions were contacted
- Not all departments communicate the various PDPs across campus, resulting in overlap and skewed data (an issue highlighted in the 2012 survey)
- Few graduate student PDPs have methods of assessing their workshops
- Little engagement with the incorporation of labour market information and outcomes into the development of graduate student PDPs, or strategies for developing positive relationships with employers

As previously noted, the survey results revealed that not all of these indicators are comparable across institutions. This was particularly true of information gathered on the number of staffing for PDP (many surveys indicated that graduate student PDP responsibilities were a part of administrators’ larger roles, handled by student volunteers, or other variables that flexed the number of staff involved from year to year) or information on tracking and results of student participation in graduate student PDP offerings.

One key observation revealed from the survey and general inquiries to administrators is that while professional development opportunities are available on most campuses, not all institutions differentiate between general professional development services for all students (such as those offered by Career Services or Writing Centers – although some of these centers also offer graduate student specific courses) and those that are tailored specifically for the graduate student experience. From this, it is important to stress that the following report is invested in highlighting professional development activities that are specifically created and offered for graduate students (which may also include postdoctoral fellows and recent alumni). Thus, whenever professional development offerings or categories are listed in this report they do not include campus offerings that may be accessible to graduate students but which are not tailored exclusively for graduate students. This is specifically the case for many Category 4 institutions that offer several avenues of professional development for students, but not those specifically tailored to the graduate level. This observation also extends to programming for international graduate students—many institutions have international student resources and workshops, but not many have programs tailored to the international graduate student experience.

This report reveals that even though there was a substantial amount of PDP activity underway in Canadian universities at the time of the 2012 report, the dedication to PDP has grown significantly. Most institutions that completed the 2016 survey reported that professional development for graduate students is a major focus for their current Graduate Studies agendas. While categorization for most institutions was not available from the previous report, there appears to be an increase in the number of universities driven towards creating a centralized program of professional development activities specifically for graduate students.

Phase 1, CAGS – August 2017
The rubric for institution categorization is used as a means to reveal groupings of institution graduate student PDP across Canada rather than as a definitive ranking. As evident in the progress in PDP since the 2012 report, the categorization breakdowns are constantly moving targets as programs are continuously evolving and growing—changing the parameters and standards of graduate student PDP in Canada. Thus, it is important to stress that the categorization of PDP is not a ranking of ideal to lacking programs, but rather a grouping of common approaches to professional development for graduate students. Within each grouping, and overall, there is a spectrum of professional development offerings that speak to the needs and resources of each institution.

One of the challenges of creating the graduate professional development program (PDP) rubric was defining the grouping of institutions between Category 1 and 2, since they were very similar in their approaches to delivering professional development opportunities for graduate students. Specifically, when considering the level of graduate student PDP activity at each of these types of institutions, it can become difficult to determine the difference between high activity (which provides advanced and basic level workshops) and considerable activity (which provides mostly basic level workshops, but may also offer some advanced level workshops as well).

The following table outlines the differences between entry level and advanced level workshops that might be offered under the skill subcategory of communication and writing:

<table>
<thead>
<tr>
<th>Sample Entry Level Communication and Writing Skills offerings</th>
<th>Sample Advanced Communication Skills Offerings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introduction to Technical Writing</td>
<td>Writing a Literature Review</td>
</tr>
<tr>
<td>Effective Writing</td>
<td>Presenting your Case Effectively</td>
</tr>
<tr>
<td>Public Speaking and Presenting</td>
<td>Facilitation Skills for Graduate Students</td>
</tr>
<tr>
<td>How to write a CV or Resume</td>
<td>How to Write Professional Emails</td>
</tr>
<tr>
<td>Introduction to Social Media</td>
<td>Managing your Message: Media Relations</td>
</tr>
<tr>
<td>Communicating with your Supervisor</td>
<td>Leading with Emotional Intelligence</td>
</tr>
</tbody>
</table>

If an institution was to offer both of these types of workshops, then it would fall into a high level of graduate student PDP activity: Category 1. If an institution was to offer only entry level skills workshops, then it would fall into a moderate level of graduate student PDP activity: Category 3. And, if an institution was to offer mostly entry level skills workshops, with some focus on advanced level skills workshop, then it would fall into a considerable level of graduate student PDP activity: Category 2.
As evident from the categorization of Canadian universities in this report, the amount of Category 2 institutions is the highest grouping, showing the promising future of graduate student PDP development across Canada. These institutions indicated, in their survey responses, their strong desire to enhance their current programs and expand them in structure and integration into the graduate student experience, effectively moving them towards a Category 1 institution.

Several Category 3 & 4 institutions acknowledge that they do not necessarily have the budget or staff requirement to construct PDPs, but have expressed a desire for sharing PDP resources. This is something to consider pertaining to the graduate student PDP categorization rubric under Student Communication. Many Category 1 universities responded that they have at least two full-time staff members, one who was largely responsible for communication and had the time/resources to manage and update various streams of communication (including multiple social media accounts)—something that is not feasible for institutions that do not have the staffing to accomplish this on a daily basis.

Cost of Graduate Student PDP Programs

The cost of graduate student PDP programs was an area where many administrators responded that they wanted more information from other institutions on their practices. Many appeared to be interested in charging small amounts for PDP offerings (in hopes that it would keep students from registering and not showing up), but were afraid that this might have a negative effect on their participation numbers. From the report findings, several programs successfully implement a no-show or late-cancellation fee for the graduate student PDP offerings and find that this is an excellent method for combating attrition.

Increase in Health and Wellness Offerings

It appears that over the last five years, although the current 2016/17 academic year shows the largest increase in this skills offering, many Category 1 and 2 institutions are focusing on increasing their workshops that deal with student health and wellness. Although this report did not gather information on how popular these skill workshops are at institutions that offer them, it was clear from the listing of GPDP offerings (Appendix A) that this is a growing piece within graduate student PDP. Concordia University, for example, has a wide variety of offerings in this category that explore health and wellness skills for graduate students well beyond basic stress management or work-life balance.
Program Evaluations

Few universities report successful attempts to evaluate the success of their graduate student PDPs. Some administrators voiced concerns over what indicators are used to evaluate the success of graduate student PDP (for example, is successful employment after graduation the only outcome measure of effectiveness?). Some administrators invite student feedback on events held, generally at the end of particular sessions. However, few report having been able to connect completion of graduate student PDP programming with student success in finding suitable work after graduation or the placement of those some years after graduation.

- **Concordia University**: administers feedback forms at the end of every workshop, as well as gathers feedback from student ambassadors though focus groups

- **Institut National de la Recherche Scientifique** sends out a survey to all workshop participants at the end of each trimester to gather their feedback.

- **McGill University**: PhD Outcomes Survey

- **Queen’s University**: administers feedback survey after each workshop, as well as general questions about participation in Expanding Horizons through our internal exit survey (after degree completion)

- **Université du Québec à Trois-Rivières**: administers a feedback form at the end of each of the courses included in its École d’Été en Pédagogie de l’Enseignement Supérieur

- **University of Lethbridge**: collects feedback at the end of workshops. A feedback survey is sent out at the end of each semester to participants of the Graduate Assistant Professional Development Program. The same was recently done for the THRIVE Program and may turn into an annual feedback survey.

- **University of Toronto**: 10 000 PhD program, which tracks career trajectories over the last 15 years compared with registration data from the graduate student PDP

- **UBC**: Administers feedback forms at the end of every workshop (collates and sends to facilitators); have just completed a PhD outcomes survey

- **University of Calgary**: Collection and review of feedback by facilitators is one requirement for My GradSkills/Faculty of Graduate Studies endorsement of programming (only a summary is provided). My GradSkills Ambassadors used as a source of graduate students for focus groups on specific topics.
Next Steps

The following are recommendations for next steps for both administrators of GPDP programs as well as for CAGS as a supportive resource for institutions. It is recommended that:

- **CAGS create an online catalogue** of the above that can become a resource for professional development programs—this is outlined in Phase 2 of this project.

- **CAGS and GPDPs collaborate to propose and pilot a framework for graduate student PDP evaluation** that could be introduced across all institutions; perhaps, altered slightly for small, medium, and large graduate institutions.

- **Graduate student PDPs continue to prioritize coordination of graduate student professional development activities** across campuses and, potentially, across institutions. In accordance the with the 2012 report, the adoption of a structural approach in each institution that emphasizes the centralization of information and the dissemination of information about graduate student PDP activity across campus is advisable.

- **Institutions create easy to navigate and student-friendly website or pages for graduate student PDP offerings.** This site should outline how GPDP benefits the students, what offerings are available thematically, how to register, as well as any information regarding forms of completion recognition. Having the information freely available to students allows them to integrate GPDP offerings more easily into their own personal graduate timelines.

- **Institutions create graduate student PDP offerings that specifically address the needs of international graduate students;** these might include information on what to expect in Canadian Graduate Studies programs, how their funding packages work, guides to international scholarships, etc. As addressed at the 2016 CAGS conference, the need for international graduate student PDP offerings is not being fully met through graduate student PDP offerings for general graduate or international students, and requires further development.
References

Appendix A – Graduate Student PDP Offerings

This list is not exclusive to each institution listed, but rather a sampling of courses that are offered based on website event calendars or information added to the 2016 CAGS survey. These offerings do not include graduate student or TA orientations, Mitacs or mygradskills.ca workshops, or graduate student conferences. Lastly, not all classes shown here are guaranteed to run for the 2016/17 academic year or, in cases were the offerings are from a previous calendar year, are still being offered.

Athabasca University: 2016/17 Offerings

- Using Educational Technologies to Improve Teaching
- Intellectual Property -- Guidelines for Graduate Students and their Supervisors
- Critical Thinking Strategies for Graduate Assignments
- Dissemination of your Research Findings
- What do Grounded Theory and Stand-up comedy have in common?
- I’m Busy Working on My Dissertation…and You Want Me to Think about Project Management as Well?
- APA Style
- Ignorance is no excuse: Don't be an accidental plagiarist

Brock University: VITAE 2014/2015 Offerings

- Ideas matter: Telling your research story
- Brave new world: Digital publishing, reach, and tracking impact
- Find work and let work find you: Advanced LinkedIn strategies
- Beyond scheduling
- Telling your teaching story: Documenting your experience in a teaching dossier
- The e-portfolio: Going digital
- Beyond research: Maximizing your benefits as a research assistant
- The "skinny” on "soft” skills
- Putting learning into practice - Putting knowledge to the test
- Spare time, rare talent: Mobilize your community researcher skills
- Researcher’s Development Framework (RDF)
- Say it like it is: Skills translation
- Resume Customization Shop
- Circuit Interviews
- Go Global: Explore opportunities abroad
- Personal branding
- Brock Toastmasters
- Join the Conversation: English Speaking + Academic Writing Skills
- TA Workshop & Certification
• TA Discussion: Languages of Teaching
• ITA (International Teaching Assistants) Discussion: Active Listening
• ITA (International Teaching Assistants): Teaching in the Canadian Classroom
• Accessible Teaching and Learning
• Instructional Strategies 101
• Creative Ideas for the Classroom
• Marking Madness: Tips & Tricks for Effective Grading
• TA Workshop: Cultivating Academic Integrity
• Find Funding: COS Pivot Training
• Scholarship Information Session: NSERC
• Scholarship Information Session: CIHR
• Scholarship Information Session: SSHRC
• Scholarship Information Session: OGS
• Get it DONE! Drop-in Scholarship Workshop
• Canada 101: Why do they behave like that?
• Canada 102: Business Etiquette
• Canadian History + Geography
• Research Proposals: The Art of Persuasive Writing
• Develop a Strong Conference Proposal: Learn Through Peer Review
• Ethics 101: Introduction to Research Ethics at Brock
• Literature Review: Graduate Student Workshop
• Grammar + Style Workshop
• Graduate Students’ Skills Mash-up
• Skills Mash-up Schedule
• Creating a Respectful Work and Learning Environment
• Mind Mapping
• Just for International Teaching Assistants: Ask-it-Basket
• Documenting Your Teaching
• Assessing Student Work: Developing Shared Expectations
• Cultural Stories in the Classroom
• TA’s Teaching About Teaching
• Research On Tap
• RefWorks for Teaching Assistants
• From Paper to Poster: The Text
• From Paper to Poster: The Design
• An Introduction to Clinical Trial Research
• Cultural Approaches to Writing: How to Create a North American Essay
• Literature Review
• Ethical Dilemmas
• Nuts and Bolts of Reflective Practice
• Collaborative Service-Learning: I-EQUIP
Carleton University: Grad Navigate Fall 2016 Offerings

Career Planning Workshops

• “I want a job in Canada. Where do I start?” Session 1: How to Effectively Begin Your Job Search in Canada
• “I want a job in Canada. Where do I start?” Session 2: Canadian Workplace Culture
• “I want a job in Canada. Where do I start?” Session 3: Introduction to the Canadian Hiring Process
• “I want a job in Canada. Where do I start?” Session 4: What to Expect in a Job Interview
• “I want a job in Canada. Where do I start?” Session 5: Staying Motivated Throughout Your Job Search
• Career Exploration Outside of Academia
• Resume Writing for Graduate Students

Health and Wellness Workshops

• Balancing Work, School, and Life
• The Imposter Syndrome
• Introduction to Mindfulness
• Managing Stress
• Procrastination
• Self-Care Strategies

International Student Writing Workshops

• ESL Writing Workshops for International Graduate Students (week-long, afternoons)

PhD Writing Workshops

• AcWriTreat 1
• AcWriTreat 2
• Gamestorm Your Research Space 1
• Gamestorm Your Research Space 2
• PhD Writing Bootcamp

Research & Writing Workshops

• Citation Management Clinic
• Grey Literature: how to keep up with it?
• Introduction to Nvivo 11 (Mac)
• Introduction to Nvivo 11 (Windows)
• Know Your (Copy)Rights!
• Measuring your Research Impact

Phase 1, CAGS – August 2017
• Research Data Management
• Understanding and Avoiding Predatory Publishers
• Writing for Scholarly Journals

Teaching Skills Workshops

• Art of Conversation: Facilitating a Discussion Group
• Developing a Framework for Teaching
• Giving Effective Presentations: The Experience of Two Nerds
• Improving Your Teaching Through Feedback
• Incorporating Activities in Discussion Groups
• Managing Challenging Teaching Situations
• Motivating Students in Online and Blended Learning Environments
• Providing Feedback to Enhance Student Learning and Engagement

Concordia University: GradProSkills 2016/2017 Offerings

Career Building

• Career management
  • Launch your Career, Volunteer!
  • Business Dining Etiquette
  • Strategic Volunteering - Making the most of your volunteer actions
  • Negotiating Your Job Offers
• Entrepreneurship
  • Develop your innovative idea(s) with the fundamentals of entrepreneurship
• Job Search
  • Job Search Skills
  • Job Search Strategies
  • Résumé Writing Strategies
  • Interviewing Skills

- Developing Strong Professional Relationships to Support Your Career Goals
- Maintaining Momentum

University of Waterloo: GRADventure 2016/2017 Offerings

Connect

- Leadership Day
- Students’ beliefs about learning
- Teaching Methods
- Teaching with confidence
- Classroom delivery skills
- Assessing and improving your teaching

Phase 1, CAGS – August 2017
• Effective lesson plans  
• Getting it done: Productive, sustainable writing practices  
• Creating memorable lectures  
• Effective lesson plans  
• Improving feedback on written assignments  
• Preparing to teach at UW  
• Shaping classroom dynamics  
• Game-based learning  
• Teaching STEM tutorials  
• Classroom delivery skills  
• Flipped Classroom  
• Building rapport with students  
• Giving quality feedback  
• Effective question strategies  

Inquire  
• Authors' rights and your research  
• Dissertation boot camp  
• Research Matters: getting published  
• Literature reviews for grad students Part A: Organizing it  
• Literature reviews for grads (Part B): Writing it  
• Graduate writing café (weekly)  
• Tri-Agency Open Access Policy - From Author's Rights to UWSpace  

Strategize  
• Academic career conference  
• Academic interviews  
• Non-academic career day  
• Networking lunch and learn  
• Parallel career planning  
• Preparing postdoc applications  
• Resumes for graduate students  
• Research statements for academic job applications  
• Statements of Teaching Philosophy  
• Translating academic experience to industry  
• Writing cover letters for graduate students  
• Writing academic CVs
Life Skills

- Sexual Misconduct Training
- Mental Health & Accessibility Services
- Time Management

Research Management

- NSERC Info Session
- RA Workshop
- Tri-Council information session
- Open Access Week
- Research Ethics
- Copyright Regulations
- Knowledge Mobilization
- Research Week (3 days)
- Grant Writing Information Session

Communication Skills

- Citation Management
- Synthesis Writing
- Navigating scholarly publishing
- Writing Introductions
- Preparing for your Defense
- Writing Conclusions
- Citations Management
- Proposal Writing
- Presentation & Public Speaking
- Reading Strategies
- Writing Abstracts
- Adapting your Writing for Presentations
- 3MT Prep Workshop

• Graduate Researchers’ Toolkit

York University: Graduate & Postdoctoral Professional Skills 2016/2017 Offerings

Career Pathways and Options

• The Academic Job Search
• Translating a CV to a Résumé workshop
• Leveraging your STEM PhD outside of academia
• Leveraging your PhD outside of academia (in the Social Sciences & Humanities)

Knowledge Transfer Strategies

• Practice Your Conference Presentation Skills I
• Communicating Assertively
Transferable Professional Skills

- Eight-Step Editing
- Project Management

Writing Success

- Writing Winning Proposals: Social Sciences and Humanities
- Writing Winning Proposals: Science, Engineering and Health
- Moving Past Dissertation Roadblocks
Appendix B – Graduate Development Program Survey: Towards a National Strategy (English, 2016)

The following is a survey to help the Canadian Association for Graduate Studies (CAGS), with the Canadian Graduate Student Professional Development Consortium, develop a catalogue of professional development program offerings at Canadian Universities with graduate programs, as well as prepare a best practices document to help CAGS providers keep up with trends and innovations.

Please fill out the following survey as fully as possible, and I will contact you to follow up as necessary.

<table>
<thead>
<tr>
<th>General Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>University name:</td>
</tr>
<tr>
<td>Office responsible for graduate development programs:</td>
</tr>
<tr>
<td>Contact name:</td>
</tr>
<tr>
<td>Contact information:</td>
</tr>
<tr>
<td>Name of program:</td>
</tr>
<tr>
<td>Website:</td>
</tr>
<tr>
<td>Social media accounts related to program:</td>
</tr>
<tr>
<td>Who is responsible for updating information for websites?</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Graduate Professional Development Programs</th>
</tr>
</thead>
<tbody>
<tr>
<td>What sessions are available, in person or online? (workshops, webinars, blog, etc.)</td>
</tr>
<tr>
<td>Are there sessions specifically for international students?</td>
</tr>
<tr>
<td>Question</td>
</tr>
<tr>
<td>-------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Are there mentorship or internships opportunities included in the program?</td>
</tr>
<tr>
<td>What skills or competencies do the sessions focus on?</td>
</tr>
<tr>
<td>List sessions by topic and identify those in highest demand.</td>
</tr>
<tr>
<td>Who is eligible for sessions? (students, postdocs, alumni, etc.)</td>
</tr>
<tr>
<td>Are professional development programs mandatory for students to graduate; or are they part of a student-supervisor checklist?</td>
</tr>
<tr>
<td>Does the program offer academic credit or formal recognition (badges, certificates, etc.) to participants?</td>
</tr>
<tr>
<td>Who develops and delivers the sessions? (graduate studies, other departments, students, professors, alumni, external organizations, etc.)</td>
</tr>
<tr>
<td>How are the sessions promoted?</td>
</tr>
<tr>
<td>How do participants register? (through a centralized system or a partner company)</td>
</tr>
<tr>
<td>Is there additional cost or fees for registrants?</td>
</tr>
</tbody>
</table>
### Statistical Information

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>How many sessions run each year?</td>
<td></td>
</tr>
<tr>
<td>How many staff members are involved in administering the central sessions?</td>
<td></td>
</tr>
<tr>
<td>How is participation in sessions tracked?</td>
<td></td>
</tr>
<tr>
<td>Is there information available to measure the effectiveness of attending sessions and securing employment after graduation?</td>
<td></td>
</tr>
</tbody>
</table>

### Departmental Level

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do departments offer professional development programs internally? If so, which?</td>
<td></td>
</tr>
<tr>
<td>Are there collaborative offerings between departments and the graduate professional development program office?</td>
<td></td>
</tr>
</tbody>
</table>

### General Questions

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do you incorporate labour market information and outcomes into the development of specific components of graduate professional development programs?</td>
<td></td>
</tr>
<tr>
<td>Is there any additional information you would like to share?</td>
<td></td>
</tr>
<tr>
<td>Do you incorporate strategies for developing positive relationships with employers?</td>
<td></td>
</tr>
</tbody>
</table>
